

Open problems: voting sheet

MATRIX–RIMS Tandem Workshop

14–18 September 2026

Tick the problems you would most like to discuss.

No.	Problem	Vote
Higher-order geometric flows		
1	Giga's conjecture	☐
2	Circular stability at the critical parameter	☐
3	Stability of conical surface-diffusion pinchoff	☐
4	Convergence to a flat-core elastica	☐
12	Finite-time singularities of classical Willmore flow	☐
Regularity and free-boundary evolution		
5	Critical regularity for forced Brakke flow	☐
7	Boundary regularity with unequal geometric scales	☐
8	Singular contact with a shrinking obstacle	☐
9	Selection of jumps in droplet evolution	☐
Ancient solutions and concentration		
6	Uniqueness of the collapsed ancient Ricci flow	☐
10	Five or more interacting bubbles	☐
Variational geometry and elliptic rigidity		
11	The critical catenoid and the fourth width	☐
13	The higher-genus Willmore–Kusner conjecture	☐
14	Chen's Euclidean biharmonic conjecture	☐
15	De Giorgi's monotone Allen–Cahn conjecture	☐

Problem numbers match the presentation.
